

# Are you missing out on free rebates?

Sundowner Sustainability Consulting LLC can help at no up-front cost! Get credit (and money) for going green!

## New Construction

**Get credit!** If you're designing your new building with green features in mind, or are on the fence about paying more for more efficient upgrades, ask us about getting a rebate. We handle the paperwork, energy modeling, and reviewer questions so you can focus on building your building!

- Service includes whole building energy modeling using California Energy Commission-approved software!

## Upgrade/Remodel

**Stop losing money!** If you're going to add efficient upgrades during your upcoming remodel, don't miss out on rebates from your local utility. Contact Sundowner to get those missing dollars back in your pocket!

- Includes savings calculations
- Free review of all rebate-eligible upgrades
- Includes review of electricity, natural gas, and water rebates

## And more!

**Energy, Water, Appliances, Landscaping...** We can analyze all aspects of your purchasing and construction to see if you qualify for rebates. Because we look across multiple utility programs, we'll make sure you get credit for everything you're doing to go green!

- Includes new appliances, irrigation upgrades, and equipment- not just construction!

## No Up-Front Cost! Flat 20% Commission Charged on Final Rebate Amount

- No hourly fees, no up-front cost, no hassle
- Don't leave rebate money on the table!
- Other payment structures negotiable

# How to get started:

From start to finish, **Sundowner Sustainability Consulting LLC** will take care of your rebate application with no up-front cost or risk to you.

## Step 1- Pre Construction

### Contact Utility Company

If required, we'll contact auditors from your local utility on your behalf for a pre-construction inspection

**Contact us!** Many rebates require an inspection BEFORE you finalize your building design. Maximize your rebate awards by letting us know what you plan to do!

## Step 2- Inspection

## Step 3- Approval

## Step 4- Verification

### Save the Receipts

Just hang onto the receipts and we'll take care of the rest!

### Let us handle your application!

- Service includes energy modeling and calculations, document preparation, and the paperwork
- We'll answer technical questions from reviewers and auditors so you don't have to!
- Includes submittal of verification paperwork once you've completed your project

## Step 5- Enjoy your rebate money!

### No Hassle, No Upfront Cost

Our flat 20% commission-based payment structure ensures we maximize your rebate. We only get paid when you do!

Don't forget to ask about our other services including green certification coaching and marketing for LEED, ISO 14001, Green Business Certification, and more!
